ENGINEER'S STATEMENT

This Report is prepared pursuant to Article XIID of the California State Constitution (Proposition 218) and the State of California Property and Business Improvement District Law of 1994 and augmented by Article 15 of the San Francisco Business and Tax Regulations Code.

The Discover Polk Community Benefit District ("DPCBD") will provide activities either currently not provided or are above and beyond what the City of San Francisco provides. These activities will specially benefit each individual assessable parcel in the DPCBD. Every individual assessed parcel within the DPCBD receives special benefit from the activities identified under Section B of this Report. Only those individual assessed parcels within the DPCBD receive the special benefit of these proposed activities; parcels contiguous to and outside the DPCBD and the public at large may receive a general benefit, as outlined in Section E. The cost to provide general benefits, if any, will be funded from sources other than special assessments.

The duration of the proposed DPCBD is eleven (11) years, commencing January 1, 2019. An estimated budget for the DPCBD improvements and activities is set forth in Section D. Assessments will be subject to an annual increase of up to 5% per year as determined by the Owners' Association. Assessment increases must stay between 0% and 5% in any given year. Funding for the DPCBD improvements and activities shall be derived from a property-based assessment of each specially benefitted parcel in the DPCBD. A detailed description of the methodology for determining the proportional special benefit each individual assessable parcel receives from the service and the assessment for each parcel is set forth in Section F.

I hereby certify to the best of my professional knowledge that each of the identified assessable parcels located within the DPCBD will receive a special benefit over and above the benefits conferred to those parcels outside of the DPCBD boundary and to the public at large and that the amount of the proposed special assessment is proportional to, and no greater than the special benefits received.

Respectfully submitted,

A handwritten signature in blue ink that reads "Terrance E. Lowell".

Terrance E. Lowell, P.E.

SECTION A: LEGISLATIVE AND JUDICIAL REVIEW

Property and Business Improvement District Law of 1994

The State Law as augmented by Article 15 of the San Francisco Business and Tax Regulations Code is the legislation that authorizes the City to levy assessments upon the real property for the purposes of providing improvements and activities that specially benefit each individual assessed parcel in the DPCBD. The purpose of the DPCBD is to encourage commerce, investment, business activities and improve residential serving uses. In order to meet these goals, CBDs typically fund activities and improvements, such as, enhanced safety and cleaning and enhancing the environment. Unlike other assessment districts which fund the construction of public capital improvements or maintenance thereof, CBDs provide activities and improvements "to promote the economic revitalization and physical maintenance of the business districts of its cities in order to create jobs, attract new businesses, and prevent the erosion of the business districts." (Streets and Highways Code Section 36601(b)). The improvements and activities funded through the DPCBD are over and above those already provided by the City within the DPCBD's boundaries. Each of the DPCBD activities or improvements is intended to increase building occupancy and lease rates, to encourage new business development, attract residential serving businesses and services, and improve the quality of life for its residents.

Specifically, the State Law defines "Improvements" and "Activities" as follows:

*"Improvement" means the acquisition, construction, installation, or maintenance of any tangible property with an estimated useful life of five years..."*¹

"Activities" means, but is not limited to, all of the following:

- (a) Promotion of public events which benefit businesses or real property in the district.*
- (b) Furnishing of music in any public place within the district.*
- (c) Promotion of tourism within the district.*
- (d) Marketing and economic development, including retail retention and recruitment.*
- (e) Providing safety, sanitation, graffiti removal, street and sidewalk cleaning, and other municipal services supplemental to those normally provided by the municipality.*
- (f) Activities which benefit businesses and real property located in the district.*²

Article XIID of the State Constitution

In 1996, California voters approved Proposition 218, codified in part as Article XIID of the State Constitution. Among other requirements, Article XIID changes the way local agencies enact local taxes and levy assessments on real property. It states, in relevant part, that:

(a) An agency which proposes to levy an assessment shall identify all parcels which will have a special benefit conferred upon them and upon which an assessment will be imposed. The proportionate special benefit derived by each identified parcel shall be determined in relationship to the entirety of the capital cost of a public improvement, the maintenance and operation expenses of a public improvement, or the cost of the property related service being provided. No assessment shall be imposed on any parcel which

¹ California Streets and Highways Code, Section 36610.

² California Streets and Highways Code, Section 36613.

exceeds the reasonable cost of the proportional special benefit conferred on that parcel. Only special benefits are assessable, and an agency shall separate the general benefits from the special benefits conferred on a parcel. Parcels within a district that are owned or used by any agency, the State of California or the United States shall not be exempt from assessment unless the agency can demonstrate by clear and convincing evidence that those publicly owned parcels in fact receive no special benefit.

(b) All assessments shall be supported by a detailed engineer's report prepared by a registered professional engineer certified by the State of California.³

"Special benefit" means a particular and distinct benefit over and above general benefits conferred on real property located in the district or to the public at large. General enhancement of property value does not constitute "special benefit."⁴

Judicial Guidance

Since the enactment of Article XIID, the courts have rendered opinions regarding various aspects of Article XIID. The notable portions of cases that apply to assessment districts in general and this Discover Polk CBD in particular are noted below.

"The engineer's report describes the services to be provided by the DPCBD [i.e. the DPCBD]; (1) security, (2) streetscape maintenance (e.g., street sweeping, gutter cleaning, graffiti removal), and (3) marketing, promotion, and special events. They are all services over and above those already provided by the City within the boundaries of the DPCBD. And they are particular and distinct benefits to be provided only to the properties within the DPCBD, not to the public at large—they 'affect the assessed property in a way that is particular and distinct from [their] effect on other parcels and that real property in general and the public at large do not share."⁵

"...separating the general from the special benefits of a public improvement project and estimating the quantity of each in relation to the other is essential if an assessment is to be limited to the special benefits."⁶

"...the agency must determine or approximate the percentage of the total benefit conferred by the service or improvement that will be enjoyed by the general public and deduct that percentage of the total cost of the service or improvement from the special assessment levied against the specially benefitted property owners."⁷

"...even minimal general benefits must be separated from special benefits and quantified so that the percentage of the cost of services and improvements representing general benefits, however slight, can be deducted from the amount of the cost assessed against specially benefitting properties."⁸

The contents of this Engineer's Report are prepared in compliance with the above noted authorizing legislation, the State Constitution and the judicial opinions.

SECTION B: IMPROVEMENTS AND ACTIVITIES

The Discover Polk CBD Steering Committee collectively determined the priority for improvements and activities that the DPCBD will deliver. The primary needs as determined by the property owners are Environmental Enhancements, such as; Clean and Safe programs, and Economic Enhancements, such as; marketing and business support. Specifically, the Discover Polk CBD shall provide the following activities.

Environmental Enhancements

Cleaning & Hospitality Ambassadors

To respond to stakeholder priorities and guiding principles to make Discover Polk both more welcoming, clean and beautiful, the DPCBD will fund an Ambassador program that is similar to what has been deployed in the Lower Polk CBD. In Lower Polk, the Ambassador program has been a critical element to stabilize streets in less than one year.

The Management Plan provides for the weekly deployment of 250 hours for uniformed Cleaning and Hospitality Ambassadors throughout the district. The service mix and hours of deployment can be adjusted for seasonal and/or weekly variations in use. Anticipated duties of Ambassadors are anticipated as follows:

Cleaning Activities

- Litter removal/pan and broom
- Detail cleaning of public amenities
- Graffiti removal
- Weed removal
- Pressure washing of sidewalks
- Spot cleaning as requested

Hospitality Activities

- Regular safety patrols of the district
- Business and visitor contacts
- Outreach with street populations
- Case management approach with chronically homeless individuals

Beautification and Placemaking

In addition to the Cleaning and Hospitality program, DPCBD environmental enhancements include funds to invest in highly visible improvements that will add to the attractiveness of public spaces throughout the district. Beautification and Placemaking improvements may include:

- Landscaping, planters, hanging flower baskets and other green elements.
- Seasonal holiday decorations and banners.
- Cosmetic capital improvements, including street furniture, information kiosks, pedestrian lighting and other amenities.
- Wayfinding and directional signage to help visitors navigate through the district.
- Temporary and permanent public art installations.
- Installation of bicycle racks and other amenities to encourage bicycle use.

- Planning and design processes to improve public spaces throughout the district.
- Other improvements as determined year-to-year by the Discover Polk CBD Advisory Committee.

Economic Enhancements

Business support initiatives have been included as a key component of the Discover Polk CBD, including:

Business Support

The DPCBD will aim to strengthen the district's existing offerings and citywide position for local unique dining and shopping. The DPCBD will fund efforts aimed at attracting new tenants and investment and promote continued mixed use development.

Marketing and Communications

Marketing and communications efforts will support all components of the DPCBD Management Plan. Marketing related to environment services will create awareness of cleaning, hospitality and beautification changes being made to improve the district. Marketing related to the economy portion of the work program will aim to advance the image and branding of Discover Polk, support property owners in efforts to attract unique tenants and explore ways to connect district residents to local stores and restaurants, such as "buy local" campaigns or the development of a district directory, website and supporting social media.

District Coordinator, Administration and Reserve

Like any business, the DPCBD requires a professional staff to properly manage programs, communicate with stakeholders and provide leadership. To reduce administrative costs, increase leveraging of funds and avoid duplication of enhanced services, this plan anticipates that the day-to-day services financed by the DPCBD will be managed jointly with the Lower Polk CBD (see "Governance"). DPCBD funds can be further leveraged by sponsorships from special events, contracts, grants and earned income.

A full time professional district coordinator will manage all initiatives, maintain ongoing communications with the Discover Polk CBD Advisory Committee and district ratepayers and provide leadership through research and community education to represent the community with one clear voice.

Administrative costs may include:

- Accounting and annual financial review and/or audit
- Insurance
- Program support costs including supplies, equipment and rent
- Other administration costs associated with the overhead and administrative support of programs.

A reserve is also budgeted to provide a contingency for unforeseen program needs and to provide a cushion for assessment delinquencies. Reserve funds may also be utilized to pay for costs associated with DPCBD strategic planning and renewal.

SECTION D: PROPORTIONAL BENEFITS

Methodology

Article XIIID Section 4(a) of the State Constitution states that "The proportionate special benefit derived by each identified parcel shall be determined in relationship to the entirety of the capital cost of the public improvement, the maintenance and operation expenses of a public improvement, or the cost of the property related service being provided."

Determining the proportionate special benefit among the parcels of real property within the proposed assessment district which benefit from the proposed improvements, services, and activities is the result of a four-step process:

1. Defining the proposed activities,
2. Determining which parcels specially benefit from the proposed activities,
3. Determining the amount of special benefit each parcel receives,
4. Determining the proportional special benefit a parcel receives in relation to the amount of special benefit all other parcels in the DPCBD receive.

Each identified parcel within the Discover Polk CBD will be assessed based upon each parcel's unique characteristics in relationship to all other specially benefitted parcels' characteristics. Due to the proportionate special benefits received by each parcel from the DPCBD services, each parcel will be assessed a rate which is commensurate with the amount of special benefits received.

Special Benefit Factors

The methodology to levy assessments upon real property that receives special benefits from the improvements and activities of the Discover Polk Business Improvement District is Lot Square Footage plus Building Square Footage and Linear Street Frontage. Lot square footage is relevant to the highest and best use of a property and will reflect the long term value implications of the improvement district. Building square footage is relevant to the interim use of a property and is utilized to measure short and mid-term special benefit. Street front footage is relevant to the street level usage of a parcel.

Lot square footage is defined as the total amount of area within the borders of the parcel. The borders of a parcel are defined on the County Assessor parcel maps. Lot square footage is used to apportion 75% of the Environmental activities and 100% of the Economic and District Coordinator activities.

Building square footage is defined as the total building square footage as determined by the outside measurements of a building. The gross building square footage is taken from the County of San Francisco's Assessor's records. Building square footage is used to apportion 75% of the Environmental activities and 100% of the Economic and District Coordinator activities.

Linear street frontage is defined as the number of linear feet of each parcel that directly fronts on a street that will receive the PBID activities. Parcels with more than one street frontage such as corner lots or whole block parcels may be assessed for the sum of all the parcels' street frontage. Linear street frontage is used to apportion 25% of the Environmental activities acknowledging the benefits delivered at the street level.

Property Use Considerations

The methodology provides the following treatments for property used exclusively for residential, nonprofit and government and parking structures:

Residential Property: All residential parcels receive the same level of service and special benefit from Environmental activities (i.e. clean, safe and beautiful) as all other parcels in the DPCBD by making each of these parcels cleaner, safer and more aesthetically appealing. Specifically, these parcels specially benefit from DPCBD activities, such as removing graffiti from their buildings, patrolling their sidewalks, cleaning up any debris and power washing their sidewalks, and beautifying the public space. Thus, each of these parcels is assessed for the special benefits received from the Environmental activities services. However, these parcels will not receive special benefit from Business Support and Marketing activities because those uses are not engaged in commercial or customer attraction activities, and will not specially benefit from the increased economic activities. Therefore, they will not be assessed for these activities. Mixed-use parcels with residential uses will be subject to the adjusted residential assessment rate for the portion of the parcel dedicated to residential use.

Nonprofit and Governmental Properties: Properties that are exempt from property tax, including educational and governmental institutions, and nonprofit organizations (e.g. faith-based, low income housing, cultural, community services, etc.), will not benefit from increased commercial activity resulting from DPCBD services and thereby will receive reduced benefits from DPCBD services. An owner of real property located within the DPCBD boundaries may reduce their assessment if ALL of the following conditions are met:

1. The property owner is a nonprofit corporation that has obtained federal tax exemption under Internal Revenue Code section 501c3 or California franchise tax-exemption under the Revenue and Taxation Code Section 23701d.
2. The class or category of real property has been granted an exemption, in whole or in part, from real property taxation.
3. The nonprofit or governmental property owner occupies a majority of building square footage within the subject property.
4. The property owner makes the request in writing to the City of San Francisco prior to the submission of the DPCBD assessment rolls to the County Assessor (to accommodate periodic changes in ownership or use, on or before July 1 of each year), accompanied by documentation of the tax-exempt status of the property owner and the class or category of real property.
5. The City of San Francisco may verify the documentation of tax-exempt status and classification of the property for assessment purposes prior to submitting the assessments to the County Assessor.

If ALL of these conditions are met, the amount of the DPCBD assessment to be levied will be for one-half (50%) of the environmental enhancement services.

Treatment of Parking Structures: Parking structures receive different levels of benefit from DPCBD improvements and services based upon their use and ownership. Parking structures will be subject to one of the following methodologies:

- a. Integrated parking structures (i.e., those that are integrated within and/or dedicated to other buildings that have primary uses other than parking, and are also under the same ownership as the other buildings) do not receive special benefits in proportion to their building square footage. Thus, the building square footage allocated to a parcel that contains a building and an integrated parking structure will take into account the lot square footage and linear street frontage of the entire parcel, and the building square footage of the building, but will not take into account the building square footage of the parking structure.
- b. All other parking structures (i.e., stand-alone parking structures that are not ancillary to a building) will receive be assessed under all three special benefit factors, since they receive special benefits from all DPCBD improvements and activities.

New assessments for a Change in Land Use: If any parcel within the DPCBD changes land use during the life of the DPCBD, it will be subject to the assessment rate consistent with the assessment methodology for the new land use.

SECTION E: SPECIAL and GENERAL BENEFITS

State Law, Proposition 218, and judicial opinions require that assessments be levied according to the estimated special benefit each assessed parcel receives from the activities and improvements. Article XIID Section 4(a) of the California Constitution in part states that “only special benefits are assessable,” which requires that we separate the general benefits, if any, from the special benefits provided by the proposed activities and improvements.

As of January 1, 2015, the State Legislature amended the State Law to clarify and define both special benefit and general benefit as they relate to the improvements and activities these districts provide. Specifically, the amendment (Section 36615.5 of the Streets and Highways Code) defines special benefit as follows: “‘Special benefit’ means, for purposes of a property-based district, a particular and distinct benefit over and above general benefits conferred on real property located in a district or to the public at large. Special benefit includes incidental or collateral effects that arise from the improvements, maintenance, or activities of property-based districts even if those incidental or collateral effects benefit property or persons not assessed.”

In addition, the amendment (Section 36609.5 of the Streets and Highways Code) defines general benefit as follows: “‘General benefit’ means, for purposes of a property-based district, any benefit that is not a ‘special benefit’ as defined in Section 36615.5.”

Furthermore, the amendment (Section 36601(h)(2)) states: “Activities undertaken for the purpose of conferring special benefits upon property to be assessed inherently produce incidental or collateral effects that benefit property or persons not assessed. Therefore, for special benefits to exist as a separate and distinct category from general benefits, the incidental or collateral effects of those special benefits are inherently part of those special benefits. The mere fact that special benefits produce incidental or collateral effects that benefit property or persons not assessed does not convert any portion of those special benefits or their incidental or collateral effects into general benefits.”

Special Benefit Analysis

All special benefits derived from the assessments outlined in this report are for property-related activities that are specifically intended for and directly benefiting each individual assessed parcel in the DPCBD. The special benefit must affect the individual assessable parcel in a way that is particular and distinct from its effect on other parcels and that real property in general and the public at large do not share. No parcel’s assessment shall be greater than the special benefits received.

Streets and Highways Code Section 36601(e) states that “Property and business improvement districts formed throughout this state have conferred special benefits upon properties and businesses within their districts and have made those properties and businesses more useful by providing the following benefits: (1) Crime reduction. A study by the Rand Corporation has confirmed a 12-percent reduction in the incidence of robbery and an 8-percent reduction in the total incidence of violent crimes within the 30 districts studied. (2) Job creation. (3) Business attraction. (4) Business retention. (5) Economic growth. (6) New investments.”

The Discover Polk CBD's goal is to fund activities and improvements to provide a cleaner, safer and more attractive and economically vibrant environment as outlined in Section B. The goal of improving the economic vitality is to improve the safety, cleanliness, appearance, and economic development of each individual specially benefitted parcel in an effort to increase commerce, to increase building occupancy and lease rates and to attract more customers, employees, tenants and investors.

Each parcel will specially benefit from:

- Cleaner sidewalks, streets and common areas
- Real and perceived public safety improvements
- Greater pedestrian traffic
- Enhanced rental incomes
- Improved business climate
- New business and investment
- Well managed CBD programs and services

Specifically, each parcel benefits from each of the DPCBD activities as defined below.

Safety and Hospitality

The enhanced safety and hospitality activities make the area safer which attracts more businesses, customers, and residents, and ultimately private investment. When business location decisions are made, "lower levels of public safety lead to increased uncertainty in decision making and can be perceived as a signal of a socio-institutional environment unfavorable for investment." Uncertainty affects the investment environment in general. But in particular, it increases the fear of physical damage to investment assets (or to people) or their returns...Almost universally, places with lower crime rates are perceived as more desirable."⁹ Once economic investment occurs within the district, pedestrian traffic and commercial activity will increase. The special benefit to assessed parcels from these services is the likelihood of increased lease rates and tenant occupancy due to the increase of commercial activity and an increase in customers that follow from having a safer environment.

Clean and Beautification

The cleaning activities benefit each assessed parcel within the Discover Polk CBD by providing a clean and aesthetically appealing environment. This is achieved through sidewalk sweeping and power washing, removing litter and graffiti, trash removal, and weed abatement. These activities create the environment needed to achieve the CBD goals. Sidewalks that are dirty and unclean, particularly from homeless activities, deter pedestrians and commercial activity.

In addition, the beautification activities benefit each assessed parcel by providing wayfinding signage, sidewalk benches, holiday décor, planters, etc. These activities create the environment needed to achieve the PBID goals.

⁹ "Accelerating economic growth and vitality through smarter public safety management" IBM Global Business Services Executive Report, September 2012, pg. 2

Communication and Development

These activities are tied to and will specially benefit each individual parcel by encouraging business development and investment that generates customer traffic, which directly relates to increases in commercial activity, filling of vacant storefronts and offices and ultimately, increased lease rates for retail and office space. This is a benefit to the District because it works to improve the positive perception of the District. Decisions on where to shop, eat and even go to school are largely based on a perception of the place. If these activities were not communicated it would be a deterrent to pedestrian traffic, business and commerce.

Special Benefit Conclusion

Based on the special benefits each assessed parcel receives from the DPCBD activities, we conclude that each of the proposed activities provides special benefits to the real property within the district and that each parcel's assessment is in direct relationship to and no greater than the special benefits received.

The special benefit to parcels from the proposed DPCBD activities and improvements described in this report are equal to the total amount of the proposed assessment. Each individual assessed parcel's assessment is in proportion to the special benefit it receives from the DPCBD activities.

General Benefit Analysis

As required by the State Constitution Article XIID Section 4(a), the general benefits of an assessment district must be quantified and separated out so that the cost of the activities that are attributed to general benefit are deducted from the cost assessed against each specially benefitted parcel. General benefits are benefits from the DPCBD activities and improvements that are not special in nature, are not "particular and distinct" and are not over and above the benefits that other parcels receive. This analysis will evaluate and determine the level of general benefits that (1) parcels inside of the Discover Polk CBD, (2) parcels outside of the DPCBD, and (3) the public at large may receive.

General Benefit to Parcels Inside the Discover Polk CBD

The Discover Polk CBD provides funds for activities and improvements that are designed and created to provide special benefits to each individually assessed parcel within the District. Each individual assessed parcel will specially benefit from the cleaner and safer public rights-of-way and increased economic activity, thus 100% of the benefits conferred on these parcels are distinct and special in nature and that 0% of the DPCBD activities provide a general benefit to parcels in the District boundary.

General Benefit to Parcels Outside of the Discover Polk CBD

All the DPCBD activities and improvements are provided solely to each of the individual assessed parcels in the DPCBD boundary. Each of the PBID activities is provided to the public right-of-ways (streets, sidewalks) adjacent to all specially benefitted parcels or tenants in the DPCBD. None of the surrounding parcels will directly receive any of the DPCBD activities. Any benefits these parcels may receive are incidental to providing special benefits to the assessed parcels, and thus any cost associated to the incidental benefits are not reduced from the cost of providing special benefit.

General Benefit to the Public At Large

In addition to general benefit analysis to the parcels outside of the Discover Polk CBD boundary, there may be general benefits to the public at large, i.e., those people that are either in the DPCBD boundary and not specially benefitted from the activities, or people outside of the DPCBD boundary that may benefit from the DPCBD activities. In the case of the Discover Polk CBD, the public at large are those people that are within the DPCBD boundary that do not pay an assessment and do not specially benefit from the DPCBD activities.

To calculate the general benefit the public at large may receive we determine the percentage of each DPCBD activity budget that may benefit the general public. In this case, the Business Support and Marketing activities are tailored to benefit and promote each assessed parcel and are not intended to benefit the general public. If there are any public benefits, they are incidental and collateral to providing special benefits to the assessed parcels.

By contrast, the Environmental activities do generally benefit the general public to some degree, as the general public may appreciate the enhanced level of maintenance and security as it passes through the Discover Polk CBD. To quantify this, we first determine a Relative Benefit factor for the Environmental activities. The relative benefit factor is a unit of measure that compares the special benefit that the assessed parcels receive compared to the general benefit that the general public receives. To determine the relative benefit factor, we used previous studies that conducted intercept surveys in San Francisco (Union Square and West Portal) and Los Angeles (Historic Downtown, Leimert Park, Arts District, Downtown Industrial, Fashion District, and Sherman Oaks). These surveys determined the percentage of people within a district who were generally benefitted and did not engage in business activity. The surveys found that on average 1.4% of the respondents within the district boundary were not receiving any special benefits. However, to be conservative, we assigned a relative benefit factor of 0.05 (5%) to account for any potential difference between these study areas and the Discover Polk CBD. Based on our professional experience and the results of previous studies, it is reasonable to conclude that this relative benefit factor properly accounts for the general public in the District that is not specially benefitted. The relative benefit factor is then multiplied by the District activity's budget to determine the overall general benefit for the Environmental activities. The following table illustrates this calculation.

| | A | B | C |
|-----------------|----------------------|--------------------------------|---|
| ACTIVITY | Budget Amount | Relative Benefit Factor | General Benefit Allocation (A x B) |
| Environmental | \$420,000 | 5.00% | \$21,000 |

This analysis indicates that \$21,000 of the Environmental activities may be attributed to general benefit to the public at large, and must be raised from sources other than special assessments.

Total General Benefits

Using the sum of the three measures of general benefit described above, we find in year one that \$21,000 (5.0% of the Environmental budget, which is equal to 3.36% of the total DPCBD budget) may be general in nature and will be funded from sources other than special assessments.

SECTION F: COST ESTIMATE

2019 Operating Budget

The Discover Polk CBD's operating budget takes into consideration:

1. The improvements and activities needed to provide special benefits to each individual parcel within the Discover Polk CBD boundary (Section B),
2. The parcels that specially benefit from said improvements and activities (Section C), and
3. The costs associated with the special and general benefits conferred (Section E).

| EXPENDITURES | BUDGET | % of Budget |
|--------------------------------------|------------------|----------------|
| Environmental Enhancements | | |
| Clean, Safe, Homeless, Beautiful | \$420,000 | 67.20% |
| Economic Enhancements | | |
| Business Support, Marketing | \$75,000 | 12.00% |
| District Coordinator/Admin/Reservice | \$130,000 | 20.80% |
| Total Expenditures | \$625,000 | 100.00% |
| REVENUES | | |
| Assessment Revenues | \$604,000 | 96.64% |
| Other Revenues (1) | \$21,000 | 3.36% |
| Total Revenues | \$625,000 | 100.00% |

(1) Other non-assessment funding to cover the cost associated with general benefit.

Budget Notation

The cost of providing programs and services may vary depending on the market cost for those programs and services. Expenditures may require adjustment up or down to continue the intended level of programs and services. Assessments will be subject to an annual increase of up to 5% per year to address changes in the cost of providing services. The actual amount of increase will be determined by the Owners Association and will vary between 0% and 5% in any given year. Any change will be approved by the owner's association board of directors and submitted to the City within its annual planning report.

Discover Polk CBD 11-Year Projection of Assessments & Budget

| | Assessm't Budget | Commercial Rates | | Residential Rates | | Non-Profit/Gvt Rates | |
|---------|---------------------|------------------|----------|-------------------|----------|----------------------|----------|

| Year 9 | 892,383 | 0.327 | 15.36 | 0.239 | 15.36 | 0.120 | 7.68 |
| Year 10 | 937,002 | 0.343 | 16.13 | 0.251 | 16.13 | 0.126 | 8.07 |
| Year 11 | 983,852 | 0.360 | 16.94 | 0.264 | 16.94 | 0.132 | 8.47 |

Assumption: Maximum 5% adjustment each year

Future Development

The above table is based on the district's current development status and does not account for possible increases to assessments due to changes to the parcel characteristics that are used to allocate special benefits (e.g., building square footage). The amount of each parcel's assessment will depend on the existing assessment rates as well as the specific characteristics of the parcel, as explained in further detail below in Section 5. Each parcel will be assessed on a prorated basis from the date it receives a temporary and/or permanent certificate of occupancy. Thus, changes to a parcel may result in corresponding revisions to the assessments. Over time the total assessments levied in the district likely will increase as parcels are developed.

SECTION G: APPORTIONMENT METHOD

Assessment Methodology

As previously discussed in Section D, the DPCBD is segregated and into three land use types that benefit differently from the DPCBD activities. The table below summarizes the assessable lot square footage, building square footage and linear street frontage for each land use type.

| Land Use | Lot Sq. Ft. | Bldg Sq.Ft. | Linear |
|-----------------------|-------------|-------------|--------|
| Commercial | 391,971 | 875,701 | 4,713 |
| Residential | 350,810 | 940,792 | 4,285 |
| Non-Profit/Government | 102,366 | 78,903 | 1,192 |

Calculation of Assessments

Based on the special benefit factors, assessable square footage and the proposed budget, all of which are discussed above, the following table illustrates the first year's maximum annual assessment per parcel assessable square foot per each zone.

| Land Use | Per sq.ft. of Lot + Building per Year | Per Foot of Linear Frontage |
|----------------------|---------------------------------------|-----------------------------|
| Commercial | \$ 0.221 | \$ 10.40 |
| Residential | \$ 0.162 | \$ 10.40 |
| Nonprofit/Government | \$ 0.081 | \$ 5.20 |

Sample Parcel Assessment

To calculate the assessment for a commercial parcel with a 1,000 square foot lot, a 1,500 square foot building, and 50 linear feet the calculation is as follows:

| | |
|--|-----------------|
| Lot square feet (1,000) x \$0.221 = | \$221.00 |
| Building square feet (1,500) x \$0.221 = | \$331.50 |
| Linear street frontage (50) x \$10.40 = | <u>\$520.00</u> |
| Total Parcel Assessment = | \$1,072.50 |

The assessment calculation is the same for every parcel in the DPCBD respective of the land use and assessment rates.

Public Property Assessments

The District will provide all the improvements and activities to the City of San Francisco or any other government-owned parcels with the DPCBD boundary. All publicly-owned parcels will pay their proportional share of costs based on the special benefits conferred to those individual parcels. Public owned parcels, such as the library and park will receive special benefit from District services that lead to increased use which directly relates to fulfilling their public service mission. Article XIII D of the California Constitution was added in November of 1996 to provide for these

assessments. It specifically states in Section 4(a) that “*Parcels within a district that are owned or used by any agency...shall not be exempt from assessment unless the agency can demonstrate by clear and convincing evidence that those publicly owned parcels in fact receive no special benefit.*” Below is the one publicly-owned parcel that specially benefits from the DPCBD activities.

| APN | OWNER NAME | SITE ADDRESS | PARCEL ASSESSMENT |
|----------|------------------------------|---------------|-------------------|
| 0573-001 | RECREATION & PARK DEPARTMENT | 1401 BROADWAY | \$4,326.34 |

Maximum Annual Assessment Adjustments

The cost of providing programs and services may vary depending on the market cost for those programs and services. Expenditures may require adjustment up or down to continue the intended level of programs and services. Assessments maybe subject to annual increases not to exceed the assessment rates in the table below for any given year. Increases will be determined by the District Owner's Association and will vary between 0% and 5% in any given year. Any change will be approved by the owner's association board of directors and submitted to the City within its annual planning report, pursuant to Section 36650 of the California Streets and Highways Code.

Budget Adjustment

Any annual budget surplus will be rolled into the following year's District budget. The budget will be set accordingly, within the constraints of the management plan to adjust for surpluses that are carried forward. District funds may be used to fund the cost of renewing the District. Funds from an expired District shall be rolled over into the new District if one is established, or returned to the property owners if one is not established, in accordance with the Streets and Highways Code section 36671.

If an error is discovered on a parcel's assessed footages, the District may investigate and correct the assessed footages after confirming the correction with the San Francisco County Assessor's office. The correction will be made in accordance with the assessment methodology and may result in an increase or decrease to the parcel's assessment.

The cost of providing programs and services may vary depending on the market cost for those programs and services. Expenditures may require adjustment up or down to continue the intended level of programs and services. The owner's association shall have the right to reallocate up to 10% by line item of the budget allocation within the budgeted categories. Any change will be approved by the owners' association board of directors and submitted to the City of San Francisco within its annual planning report, pursuant to Section 36650 of the California Streets and Highways Code. The overall budget shall remain consistent with this Management District Plan. Each assessed parcel pays for 100% of the special benefit received based on the level of benefit received.

Bond Issuance

The District will not issue bonds.

SECTION H: ASSESSMENT ROLL

The total assessment amount for FY 2018/2019 is \$604,000 apportioned to each individual assessed parcel, as follows.

| APN | OWNER NAME | SITE ADDRESS | PARCEL ASSESSMENT |
