

Poll Worker Public Health Self-Screening Checklist

You must review and pass this screening before taking part in any public poll worker activity, including any in-person training or service in any public space, including your assigned polling place. If you answer "Yes" to any of the questions below, do not report to training or Election Day service -- instead, call (415) 554-4395 and go to sf.gov/gettested as soon as possible.

1. Do you currently have or in the past 24 hours had any one of the following symptoms which is new or not explained by another reason?

- fever at or above 100.4 F (38.0 C)
- cough, difficulty breathing, or shortness of breath
- fatigue, body aches, or headache
- chills, sweats, or sore throat
- persistent sneezing or runny nose (not allergies)
- new loss of smell or taste, or diarrhea

☐ YES

☐ NO

2. If you are not fully vaccinated*, have any of your close contacts tested positive for COVID-19 in the last 14 days?**

☐ YES

☐ NO

3. Within the past 10 days, have you been diagnosed with or tested positive for COVID-19?

☐ YES

☐ NO

**People are considered fully vaccinated for COVID-19 two weeks or more after they have received the second dose in a 2-dose series (Pfizer-BioNTech or Moderna), or two weeks or more after they have received a single-dose vaccine (Johnson and Johnson)*

*** A close contact is anyone who:*

- *Lives with you*
- *Was within 6 feet of you for a total of 15 minutes or more over 24 hours*
- *Exposed you to direct contact with their bodily fluids, including from intimate partners*

Note: Passing this self-screening does not provide a guarantee that you are free from infection of any kind. Because it is possible to transmit COVID-19 and/or other pathogens without having been knowingly exposed and without showing common symptoms, poll workers who answer "No" to all questions must still take precautions to protect themselves and others while in training or serving on Election Day.
