

優先選擇投票

三藩市選民使用優先選擇投票來選舉大部份的本地公職。在選票上，所有候選人的姓名將列於三個重複的直欄中。同一公職，您可以順序排列最多三位候選人。

Ranked-Choice Voting

San Francisco voters use ranked-choice voting to elect most local offices. The names of all candidates are listed in three repeating columns on the ballot. You can rank up to three candidates for the same office.

- Select only **one candidate** per column
- Select a **different candidate** in each column
- To rank fewer than three candidates, leave any remaining columns blank

- 在每一欄只可以選擇一位候選人
- 在每一欄選擇一位不同的候選人
- 如要排列少於三位候選人，請把其餘的欄目留空

How Ranked-Choice Voting Works

Everyone's first-choice vote is counted.

If a candidate has the majority of first-choice votes — more than half — that candidate wins.

If no candidate has the majority of first-choice votes, the candidate in last place is eliminated.

Votes for the eliminated candidate transfer to the next-choice candidates marked on those ballots.

If one candidate has the majority after these remaining votes are transferred, that candidate wins.

If there is still no candidate with the majority of votes, the process of eliminating candidates and transferring remaining votes continues until one candidate has the majority.

優先選擇投票如何運作

所有選民的第一選擇選票會被計算。

如果有候選人取得第一選擇的多數票，即超過半數，該候選人隨即當選。

如果沒有候選人取得第一選擇的多數票，獲得最少票數的候選人會被淘汰。

被淘汰的候選人獲得的選票將會被轉移到各選民在其選票上選擇的下一位候選人。

如果有候選人在轉移選票後獲得多數票，該候選人則勝出。

如果仍然未有任何候選人獲得多數票，則繼續進行淘汰候選人及轉移選票的程序，直至有一位候選人取得多數票當選。
